### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Rejections – 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Malik (US 6,324,269).
2. In regards to claims 1, 6, 7, 12, 13, and 18, Malik discloses a method and system for establishing a call from a first device (See Fig. 2 and calling party/subscriber office telephone 204a) to a second device (See Fig. 2 and called party's telephone 204b) comprising: receiving a call placed by a user from the first device; receiving from the first device information (i.e., the telephone number of the called party) regarding the second device; receiving from the first device information useful for associating the user with a third device (See Fig. 2 and home telephone 264c); transferring the call to a first switch (See Fig. 2 and service switching point (SSP) 220c) associated with the third device; forwarding the call from the first switch to a second switch (See Fig. 2 and SSP 220b) using the information received from the first device, the second switch being

Art Unit: 2614

associated with the second device; and completing the call from the second switch to the second device (See col. 1 lines 57-66 and col. 6 lines 35-54).

3. In regards to claims 2, 8, and 14, Malik discloses the method and system, wherein receiving from the first device information regarding the second device comprises: sending a prompt to the first device such that the first device provides the user with audible instructions; and receiving speech information from the user regarding the second device (See col. 2 lines 54-64, col. 3 lines 3-11, and col. 9 lines 26-34).

4. In regards to claims 3 and 15, Malik discloses the method and system, wherein receiving from the first device information regarding the second device comprises: receiving information from the user via speech regarding contact stored in a user's address book (i.e., destination list); and retrieving from the address book information specifying the second device using the contact information; wherein transferring the call from the first switch to the second switch includes using the record device information retrieved from the address book (See col. 2 lines 48-64 and col. 9 lines 35-58).

5. In regards to claims 4 and 16, Malik discloses the method and system, wherein receiving from the first device information regarding the second device comprises: receiving from the user a command to search an address book for a contact; receiving search criteria from the user; retrieving contact information from the address book using the search criteria; sending to the first device the retrieved contact information; receiving from the first device selection information specifying at least one contact; and wherein transferring the call from the first switch to the second switch, includes using information

retrieved from the address book regarding the at least one specified contact (See col. 2 lines 48-64 and col. 9 lines 35-58).

6. In regards to claims 5, 11, and 17, Malik discloses the method and system, wherein receiving search criteria (e.g., the destination number) comprises receiving speech information from the user (See col. 2 lines 54-64, col. 3 lines 3-11, and col. 9 lines 26-34).

7. In regards to claims 9 and 10, Malik discloses the system, further comprising a storage device (i.e., SCP database) storing an address book (i.e., destination list) for the user; and a set of one or more processors for accessing the address book; wherein the set of processors for receiving information from the first device is capable of receiving speech information from the user regarding a contact stored in the user's address book and sending a query to the set of processors for accessing the address book regarding the received information; and wherein the set of processors for accessing the address book, in response to the query, are capable of retrieving from the address book information specifying the second device; and wherein the third switch transfers the call to the second switch using the second device information (See col. 2 lines 48-64 and col. 9 lines 35-58).

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fuller et al (US 5,588,037) teach a remote access telephone control system. Malik (US 6,807,258) teaches a method and system for billing remote

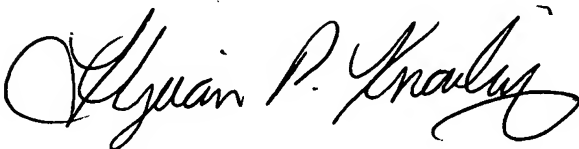

Art Unit: 2614

calls as if made from a primary line. Peoples (US 5,719,925) teaches a method for remotely controlling a telephone loop/channel from another telephone loop/channel.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P. Knowlin whose telephone number is (571) 272-7486. The examiner can normally be reached on Mon-Fri 8:30-5:00pm.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar can be reached on (571) 272-7488. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

11. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
